Quick Reference Guide

Welcome

Welcome to Switched-On Schoolhouse® 2008 School Edition

Switched-On Schoolhouse® 2008 School Edition (SOS) is a powerful educational tool that has been designed to engage students in learning and enhance the educational experience. It combines a traditional approach with multimedia, allowing students to build a solid educational foundation while interacting with the curriculum in a dynamic, hands-on way. It also uses a Christian curriculum that integrates Scripture and a biblical worldview throughout the activities and assignments.

As a teacher, you'll find that SOS has been designed to be your lesson book, resource center, and teaching assistant all rolled into one. With a grading system that automatically grades and records most scores, it will greatly reduce your administrative workload, giving you more time with your students. It also offers you the ability to customize SOS to best fit your students' needs—you'll be able to create new units, design your own projects, rearrange the order of assignments, and even set different grading scales.

How to Use This Guide

This reference guide has been designed to help you quickly and easily find what you need. Each section has a list of objectives that will give you a clue as to what you will learn in that section. As you thumb through it, you will see pictures and buttons along with quick explanations and handy tips. You will also be able to walk through step-by-step instructions that show you how to accomplish different tasks. Keep this guide next to your computer, using the organized table of contents to skip ahead to the pages you need.

This reference guide is divided into six modules:

WELCOME — Become acquainted with Switched-On Schoolhouse® 2008 School Edition

INSTALLATION — Find out how to get everything up and running

SOS ADMIN — Find out what administrative tasks need to be done and how to do them

SOS TEACHER — Understand how to be the “teacher”: set up subjects, give out assignments, and communicate with your students

ASSIGNMENTS — Learn about your student's assignments: how they should be done, how they are graded, and the different types they (and you!) will encounter

DISTANCE LEARNING — Find out how to install and use SOS's two distance learning features: remote access and synchronization, as well as the DL Parent application.

If you need help, you can also contact Alpha Omega Publications Technical Support team by calling toll-free **1-800-735-4193** or visiting **www.aopschools.com** to access our Technical Support site.
